

### **Para Los Ninos Core Principles of Safety-Care**

- Respectful, humane, non-coercive interventions
- Emphasis on prevention over management
- Consistent standards that reduce risk
- Evidence-based procedures as the basis of intervention
- Positive reinforcement is embedded throughout the interaction with the student
- Staff is certified in interventions that can be flexible and adapt to a variety of circumstances
- Physical procedures are designed to be simple, effective and safe
- Restraint must be used only when there are no other safe options and must end as quickly as possible
